Assembly Instructions (Twin, Twin XL)

Instructions de montage - Simple, Simple XL

Assembly Instructions (Full, Queen, King, Cal King)

Instructions de montage - Grand Lit Full, Grand Lit Queen, Très Grand Lit King & Très Grand Lit Cal King

Cover Instructions (All Sizes)

Unfold the cover. Similar to how you'd put on a fitted sheet, start with one corner of the foundation and pull the cover over it. Move to the next corner and repeat until each corner is tucked in securely.

Optional: Use the included Velcro strips to secure your cover. Peel off the backing to place the adhesive on each leg of your foundation, lining it up with the strip that's sewn into the cover. Press down firmly to secure.

Headboard Bracket Installation (Optional)

1. Pull the cover back to expose the end of the frame, where you'll be attaching the brackets.

2. Determine your bracket orientation, depending on your specific headboard—you'll see several different slots to choose from, and they can be used either horizontally or vertically.

3. Use the small bolts to secure the bracket to the frame where it will line up best with your headboard. Simply hand-tighten; you do not need a nut.

Note: If you can only get one bolt to line up, that's OK! Tighten as best as you can.

4. Pull the cover back into place.

Couverture d'Instructions

Dépliez la couverture. Tout comme lorsque l'on met un drap contour sur un lit, commencez avec un coin et tirez la couverture par-dessus la base. Allez au coin suivant et répétez jusqu'à ce que chaque coin soit inséré sous la base.

Optional: Utilisez les bandes adhésives pour fixer votre couverture. Décoller l'arrière pour placer le côté adhésif sur chaque patte de la base tout en l'alignant avec la bande cousue à la couverture. Appuyez fermement.

Installation des fixations de tête de lit (Optionnel)

1. Tirez doucement la couverture de façon à exposer l'extrémité du cadre, là où vous attacherez les fixations.

2. Déterminez l'orientation de vos fixations, dépendamment de votre tête de lit—choisissez une des fentes que vous verrez. Vous pourrez les utiliser horizontalement ou verticalement.

3. Utilisez les petits boulons pour attacher la fixation au cadre, là où vous trouverez le meilleur alignement avec votre tête de lit. Resserrez-les à la main ; vous n'avez pas besoin d'écrou.

Note: Si vous êtes seulement capable d'aligner un boulon, aucun problème ! Resserrez-le du mieux que vous pouvez.

4. Replacez la couverture.
